Re: **Well Destruction Report**
Griswold Siblings Property
1074 Highway 99W
Corning, CA
APN 69-210-88

Dear Mr. Olson,

This report presents the results well destruction activities at 1074 Highway 99W, Corning, California (site) (Figure 1), and was prepared on behalf of Ms. June Shook (contact for the Griswold Siblings) by Blue Rock Environmental, Inc. (Blue Rock). Blue Rock recently recommended "no further action" for the site in their report entitled *Second Quarter 2005 and No Further Action Request* dated June 20, 2005. The Tehama County Department of Environmental Health (TCDEH) concurred with that recommendation in a letter dated September 8, 2005, and requested proper destruction of the wells prior to issuance of a final case closure letter.

Well Destruction Activities

Prior to fieldwork, Blue Rock obtained well destruction permits from the TCDEH (permits attached).

On October 21 and 28, 2005, all three monitoring wells (MW-1 through MW-3) were destroyed by over-drilling methods. A Blue Rock geologist supervised Mitchell Drilling Environmental, a C-57 licensed driller based in Eureka, California, in well destruction activities.

Prior to destruction, each well was measured to verify the open depth of the casing. Each well was then destroyed by over-drilling the well with the same size hollow-stem augers previously used to install the wells (i.e. 8-inch diameter augers). Each well was over-drilled to the original depth, and casing materials were recovered mostly intact. The cuttings of annular material (grout, bentonite, and sand) were placed into labeled, 55-gallon DOT drums, secured out of view. The boreholes were then filled with cement grout to the surface, and the well box removed. The surface was covered with soil/gravel to match existing conditions. Well destruction information is included in Table 1, and locations of destroyed wells are shown on Figure 1.

Disposition of Investigation Derived Water and Soil

Blue Rock proposed surface disposal at the site for both investigation derived soil and water based on representative samples that were essentially free of detectable gasoline analytes. Soil and groundwater samples from MW-1 through MW-3 are representative of investigation derived soil and groundwater stored in drums at the site (Tables 2 and 3).

On October 20, 2005, Mr. Larry Olson of the TCDEH verbally approved surface disposal for investigation derived water and soil. The water was approved for immediate disposal. The soil was approved for surface disposal only after passage of the rainy season (i.e. ~April 2006), and, until that time, the soil shall remain in labeled containers, in a discrete location.

On October 21, 2005, approximately 150 gallons of investigation derived water was discharged to the surface of the site in a location approximately 75 feet east of the former southern underground storage tank pit (Figure 1).

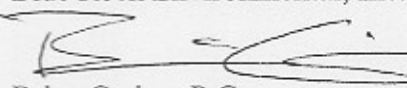

Approximately 11 drums (55-gal. each) of investigation derived soil are currently stored in a discrete location at the site. The drums are secured and labeled. The property owner will land farm this soil in the general area of the former underground storage tanks after April 2006.

Closing

This letter reports on the final activities related to this project. The monitoring wells have been properly destroyed as requested by the TCDEH, thus, Blue Rock recommends issuance of a case closure letter.

If you have any questions regarding this project, please contact me at (650) 522-9292.

Sincerely,
Blue Rock Environmental, Inc.

Brian Gwinn, P.G.
Principal Geologist

COMPENSATION.

- NOTE: 1. Provide a minimum twelve (12) hour notice prior to installing or placing annular seal.
2. A satisfactory inspection or waiver by the Health Department and receipt of a Driller's report and a disinfection statement is required for final approval of work.
3. Contact this Department within 7 days of completion of the well.
4. Scaled Plot Plan is to be furnished for all applications and shall show all septic tanks, leach lines, pits and other contamination hazards within 200 feet.

I hereby state that the information above and on plot plan is correct and true to the best of my knowledge.

I understand that the plot plan must be approved, obtained and be on site BEFORE any construction is begun. I further state, under penalty of perjury, that I am the owner of the property, the owner's authorized representative or a Licensed Well Drilling Contractor.

I understand approval of the Water Well construction does not indicate whether this property is suitable for an individual sewage disposal system or that an approval to install such a system is granted.
